King Mongkut to install B6.2m Timepac network

THE King Mongkut's Institute of Technology, Lard Krabang campus (KMUTL) recently signed a 6.2 million baht contract to install Timeplex's Timepac X.25 Packet Switching. The network will be supplied by Offer Great and Associates Co Ltd and will be operational in the National Electronics and Computer Technology Centre (NECTEC) within three months.

The Timepac X.25 Packet Switching Computer Network will link all networks at Chulalongkorn University, the Asian Institute of Technology, KMUTL and the Ministry of Science, Technology and Energy, and enable them to communicate and to rapidly exchange information with one another.

Managing Director of Offer Great and Associates Wisuit Tassana-Iam, the local distributor of Timeplex products, said the Timeplex network was selected because of its ability to provide the best information technology and integration within the network.

In Thailand, the Communications Authority of Thailand was the first to install the Timepac X.25 Packet Switching network and other Timeplex equipment has been installed at

Thai Airways International Ltd., Hutchison (Thailand) Ltd., Mitsui & Co., Ltd., The Yomiuri Shimbun (The Nation) and Shell.

Dr Kosol Petchsuwan, President of KMUTL said, "The new Timepac equipment will benefit our educational system, especially at university level. University students will have the chance to acquire hands-on experience with up-to-date technology.

"They will learn how to get information from the network, and to communicate with other students or people using the same network throughout Thailand."

He also said that, under Thailand's Sixth National Economic and Social Development Plan, top priority was being placed on the electronics and information technology industry.

Timeplex systems have been installed in more than 2,600 companies, postal and telegraph offices and government agencies throughout the world.
